

Outline for SCC-ASHI Peer Review Seminar

This seminar will be comprised of an inspection of a modular home located in a park in Colorado Springs and a 4 hour afternoon session discussing and comparing the results. The seminar will be held over two days to allow ample time for each team to properly inspect the structure without interference from other teams.

The group will be divided into two or three person teams depending on the number of people participating. Each team will include at least one Certified Inspector.

Each participant should bring his own reporting software or form. The team can decide which format to use for its report.

All inspections will be conducted on Friday with added slots on Thursday if time is needed. Two time slots will be available on Saturday morning for anyone traveling from outside the area. The time slots are shown on the application form and each inspector should request a specific time. Time will be assigned on a first come first serve basis. Teams will be determined by requested time and partners will be assigned accordingly.

The Saturday afternoon session will be held at the park club house. Each team will have time to finalize their report and then present it to the group as a whole. A full group discussion will be held at the end of the reporting period.

Please bring a copy of your professional liability insurance and your best inspector game face and let's learn from each other.
